

**City of Fernley
Qualified Professional List
2018-2020**

The City of Fernley, requested Statements of Qualifications (SOQ) from consulting firms for various engineering fields and professional services. The intent of the request was to establish an on-call list of consulting firms for various disciplines for 2018 through 2020. The list may be utilized beyond 2020 at the discretion of the City Engineer.

Projects may be assigned in three (3) different ways:

- 1) A firm may be selected by the City from the appropriate service category based upon on their project experience and qualifications,*
- 2) At least three firms from a service category may be invited to participate in a request for approach process or participate in a short interview to determine which firm's qualifications best match the project needs,or,*
- 3) The City of Fernley may issue a request for proposals and solicit responses for individual projects from all interested firms nationwide, independent of the SOQ list.*

The City has reviewed all of the SOQ submittals and placed each firm in a category based on their SOQ submittal. These are UNRANKED LISTS. Each list is arranged in alphabetical order. Firms will be selected from the list as outlined in the paragraph above.

The City would like to thank you for all of your effort and participation in this process. We look forward to working with you in the future!

Bridge Design/Inspection
