

Hello,

As you know, the State of Nevada is actively working to provide resources and information to communities statewide regarding COVID-19. As part of this effort, we will be sharing resources with all of our partners to share with the communities you serve.

The Governor recently unveiled the website [nvhealthresponse.nv.gov](https://nvhealthresponse.nv.gov), which will act as a hub for information for families, businesses, health care providers and many others. We encourage you to share this information with those you serve. More information will continue to be added, and if there is guidance you feel would be helpful, please let us know.

You can also direct your citizens to the NV Health Response Twitter account [@NVHealthRespon1](https://twitter.com/NVHealthRespon1)

To make the NV Health Response website a truly statewide resource we are asking all counties and health districts to add a link on your local page to this resource, and provide your page's link and information to [pressroom@nvhealthresponse.nv.gov](mailto:pressroom@nvhealthresponse.nv.gov) to be added to this site.

Additionally, we are developing graphics and information that can be shared across social media platforms. Watch for these resources and other communication updates soon.

We thank you for your partnership and work to protect Nevada communities during this time. Please let us know if you have any concerns or questions.

Best regards,

Shannon Litz
