Utility Service Barge

Do you have services that need to be performed from the water?

The **“Utility Service Barge”** barge can provide a safe working environment and improve confidence when working on the water. The 8 foot by 12 foot work platform’s great stability and flotation come from using two 12 foot long by 23 inch diameter pontoons. The utility barge is a great tool for servicing wastewater treatment ponds and lagoons.

We are also able to produce and customize utility barges specific to customer needs. Call us or fill out our [contact form](#) for a quote.
