In such an event the intervening cause must not be through the fault of the party asserting such an excuse, and the excused party is obligated to promptly perform in accordance with the terms of this Contract after the intervening cause ceases.
10. **INDEMNIFICATION:** The City does not require the Contractor to defend, indemnify or hold harmless the public body or the employees, officers or agents of that public body from any liability, damage, loss, claim, action or proceeding caused by the negligence, errors, omissions, recklessness or intentional misconduct of the employees, officers or agents of the public body.

Red Rock Road Traffic Analysis

ATTACHMENT A - SCOPE OF WORK

Background

It is our understanding that the City of Fernley (City) desires to improve the current unpaved extension of Red Rock Road to US 50 to include a continuous paved road cross section between Farm District Road and US 50. The purpose of this Traffic Analysis will be to support the roadway paving project of Red Rock Road.

Task 1: Project Management

Kimley-Horn (Consultant) will manage the project effort, schedule, and provide a monthly progress report and invoice. This task includes coordination with the City on the findings throughout the project and monthly status calls.

Task 2: Data Collection

Under this item, existing AM and PM peak hour vehicle turning movements will be obtained at the intersection of Red Rock Road with US 50 as well as Red Rock Road with Farm District Road including bicycle and pedestrian counts. A 24-hour volume count and vehicle classification will also be conducted along Red Rock Road.

Traffic counts can only be conducted on Tuesday, Wednesday, and Thursday per current Institute of Transportation Engineers (ITE) guidelines. Traffic counts will not be collected on holiday weekends, during abnormal weather conditions, or during periods of adjacent construction. If traffic counts cannot be collected due to unusual weather conditions or construction, the project schedule may be adjusted to account for any delays.

A site visit will also be conducted at the time of the vehicle counts to determine existing lane configurations and traffic control at the study area intersections.

Collected data will be provided to the City in PDF format.

Task 3: AADT Review

Based on the data collected in Task 2 and readily-available data from NDOT count stations, an evaluation of Annual Average Daily Traffic will be performed including the percentage of heavy trucks that currently use Red Rock Road and an estimate will be defined for anticipated future use once the roadway is paved.

Task 4: Capacity Analysis

Kimley-Horn will analyze traffic levels based on the counts conducted in Task 2 for the identified intersections. This effort will utilize Highway Capacity Manual, 6th Edition techniques for determining the LOS at the study intersections. The analysis shall include calculation of left- and right-turn storage bay lengths at the study intersections. Findings from this analysis will inform the roadway design.

Task 5: Geometric and Safety Evaluation of Red Rock Road and US50A Intersection

Kimley-Horn will evaluate intersection geometry and vehicle maneuvering at the Red Rock Road/US 50A intersection and the Red Rock Road/SR 828 intersection to determine if modifications are warranted to improve intersection functionality. Kimley-Horn will provide an exhibit recommending a configuration to improve the intersection lane alignment if issues are identified. This task will also include a crash history review and summary, evaluation of street lighting, sight lines, and other conditions affecting safety and traffic operations. The findings and recommendations will be provided in a memorandum with supporting figures.

Task 6: Technical Memorandum

The results from Task 2-5 will be summarized in a technical memorandum and provided to the City for their use.

Deliverables:

- Vehicle counts AADT data collection – PDF
- Traffic Analysis Technical memorandum – PDF
